## CLASS DESCRIPTIONS:

**PRE-BALLET:** Children learn creative dance movements incorporated with music and rhythm awareness. Helps develop muscle coordination, flexibility and good posture. Imagination, fun and good social skills are all part of the child's self-appreciation.

**INTRODUCTORY:** An extension of Pre-Ballet but more structured with the learning of the basic ballet positions, steps and body alignment.

**BALLET TECHNIQUE:** Training in the basic fundamentals of classical ballet technique. Develops placement, strength, control, concentration and self-discipline. As students advance combinations become more complex and steps must be executed with precision.

**POINTE:** Each student must be individually evaluated as when it is time to wear pointe shoes. The feet, ankles, turnout, back and abdominal muscles must be strong enough to stand on pointe correctly without the risk of injury to the students. As the students advance, they may also take designated ballet technique classes on pointe.

**VARIATIONS:** The study of classical and contemporary solo variations from famous ballets. Students gain an appreciation of the technical difficulty of the solos as well as an opportunity to express their individual style and artistic ability.

**CHARACTER:** A stylized representation of traditional folk or national dance, mostly from European countries, and uses movements and music which have been adapted for the theater. Character dance is integral to much of the classical ballet repertoire.

**PBT - PROGRESSING BALLET TECHNIQUE:**

Founded by Marie Walton-Mahon, PBT is a body-conditioning and strengthening program designed to enhance students' technique by focusing on training the muscle memory required in each exercise in all forms of dance. It is a unique training system using ballet-technique specific exercises to train skill acquisition in a graded and progressive manner from junior through advanced levels.
